Re: Request for Support of Unified NWIFC/LIO Model for National Estuary Program Fund
Distribution

Dear Leadership Council Members:

The Alliance for a Healthy South Sound requests your support of the attached Unified NWIFC/LIO Model for the distribution of National Estuary Program funds.

The Alliance is the Local Integrating Organization (LIO) recognized by the Leadership Council for the South Puget Sound Action Area. Our Executive Committee is comprised of elected officials from Pierce, Thurston, Mason and Kitsap counties and the Nisqually and Squaxin Island Indian Tribes. Our South Sound Council also includes over a score of representatives of cities, ports, citizen groups, and the Ecosystem Coordination Board representative for South Sound.

The attached model has been endorsed by Tribes and Local Integrating Organizations and is a consensus expression of the importance of those groups as full partners in the recovery of Puget Sound. And having roles dedicated for EPA, Recreation and Conservation Office, and you, as Leadership Council, underscores the importance of all participants in this effort.

We respectfully request the Leadership Council support this Unified NWIFC/LIO model for National Estuary Program funding and convey that support to EPA.

Sincerely,

Pat McCarthy, AHSS Chair
Pierce County Executive

Re: Comments on EPA's Straw Funding Models for EPA Puget Sound Geographic Program
Appropriation in FY16 and Beyond

Dear Ms. Bonifaci:

Thank you for recently convening Puget Sound tribal and local jurisdictions, as represented through Local Integrating Organizations, to discuss potential changes to the way that National Estuary Program funding is distributed in the Puget Sound Basin. At the meeting on September 26, 2014 in Edmonds you and your team were candid and clear about EPA's needs and interests for any funding approach and we believe the conversation advanced this important issue significantly.

In response to the opportunity to comment on the potential funding models presented at the September 26th meeting, this letter conveys an alternative recommended method for the distribution of National Estuary Program funding. This alternative model is endorsed by five local integrating organizations and by Puget Sound tribal governments via the Northwest Indian Fisheries Commission's Board of Commissioners. It is our understanding that the Northwest Indian Fisheries Commission will be submitting a separate letter to EPA supporting the alternative model.

Our proposal suggests that EPA develop and implement a National Estuary Program funding approach for Puget Sound similar to the one used for Salmon Recovery Funding in watersheds. That process is well understood, effective, and has broad based support. At the center of this alternative model is a commitment to allocate a portion of available funds to implementation of high priority locally identified actions that are consistent with regional recovery strategies as demonstrated by inclusion in the Comprehensive Conservation and Management Plan (the Puget Sound Action Agenda).

The attached document presents a flow chart of the NWIFC/LIO model, for comparison to those outlined by EPA on September 26th.

Angela Bonifaci
Puget Sound Team Lead

We thank you for your consideration of our ideas and we look forward to working with you to deliver NEP funding to the highest priority actions and to protect and restore this special place that we all call home. We know there are many details to work out, and we would welcome the chance to meet with you to more fully describe our model and talk about how it can best meet your and our interests.

Respectfully,

Pat McCarthy
