

DECEMBER 8, 2014

# SHELLFISH & THE ENVIRONMENT RESEARCH SYMPOSIUM

Please join us at a one-day meeting, bringing together scientists and other experts to share the latest research and information on shellfish and the environment. Speakers will cover a range of topics, including aquaculture planning and permitting, shellfish ecosystems, and seagrasses. The purpose of the meeting is to provide a baseline of current knowledge on shellfish issues in Washington State and begin a discussion of those issues.

Policy makers, managers, researchers, harvesters, and interested residents are encouraged and welcome to attend. Admission is free but space is limited. Participants are requested to pre-register at
